PRODUCT **FERRONET[®] GEL**

DESCRIPTION

MINEA FERRONET[®] GEL is an acidic, liquid scale remover with great rust removing, degreasing and decalcifying power. It is not a harmful product. Suitable for food use. BIODEGRADABLE.

CHARACTERISTICS

<i>aspect (20-25°C)</i>	transparent light dun yellowish liquid.
<i>composition</i>	mixture of acids and surfactants.
<i>pH (as is)</i>	1,50 +/- 0,1
<i>density (20°C)</i>	1,29 +/- 0,01 Kg/dm ³

APPLICATIONS AND PROPERTIES

Gel effective as rust remover. Ideal for work on vertical surfaces or where you want to avoid spillage of the product. Effective at any temperature, although its performance increases when working hot. Totally soluble in water in all proportions. It does not attack metals such as iron or copper, and can weakly attack light metals such as aluminium, zinc, or tin when they are not alloyed. It does not generate future oxidation due to vapor or residue from the product itself.

HOW TO USE

Use pure with a plastic bristle brush. Leave to act for minutes (even hours) until a paste is formed. Remove with plenty of water or absorbent material (paper or damp sponge) if you want to avoid spills.

PACKAGING

Boxes of 12 bottles of 1 Kg.
