

3M™ Disc Filter

2125 P2 Particulate

3M™ Disc Filter 2125 P2 Particulate is one of the 3M™ 2000 series of filters that provide a lightweight filter option for 3M™ Half and Full Face respirators.

Features

- Contains advanced Electret Media for maximal filtration efficiency & light weight.
- Low breathing resistance
- Approved as a P2 filter
- Lighter than conventional filters that provide comparable protection.
- Durable, water-resistant and flame retardant.
- Bayonet fitting ensures precise & safer locking
- Versatility: can be used on all 3M 6000, 3M 7000 & 3M 7500 Series Half Masks and Full Face Masks
- The 3M™ Disc Filter 2125 can be used in industries where excess levels of particulates are present in the work-place atmosphere.

Specifications

- Weight: 8g per filter (nominal).
- Size: 11cm Ø x 1cm deep (nominal).
- Tested and meets specifications to AS/NZS 1716:2003 Class P2 particulate filter when used with compatible 3M respirators.
- Able to be used for protection from mechanically and/or thermally generated particulates i.e. it therefore provides protection against dusts, mists, welding fumes, smokes and biological agents such as Legionella, Q fever and anthrax.
- When selected and used in accordance with AS/NZS 1715, the 3M™ Disc Filter 2125 is capable of providing protection against particulates at levels up to ten (10) times the Exposure Standard on a half face mask and up to fifty (50) times the Exposure Standard on a full face mask.
